EDUCATION

University of South Florida

Tampa, FL

Bachelor of Science in **Computer Engineering**; GPA: 3.8/4.0

Graduation: **May 2027**

Honors: USF Judy Genshaft Honors College, USF Green & Gold Presidential Award

TECHNICAL SKILLS

Relevant Coursework: Software Engineering (Python, C), Data Structures & Algorithms (C++), Discrete Mathematics, Digital Logic & Circuit Design, Computer Architecture, Cryptographic Hardware & Secure Systems

Languages: Python, Java, C/C++, HTML, CSS, JavaScript, TypeScript, SQL, NoSQL

Technologies: React, Next.js, Node.js, Flask, Angular, Tailwind CSS, Firebase, PostgreSQL, MongoDB, Git, JIRA, Vercel

EXPERIENCE

Software Developer, Intern

May 2025 – August 2025

International Development Cooperation Agency (GIZ)

Cairo, Egypt

- Deployed **REST APIs** and **cloud-based dashboards** using **Flask** and **PostgreSQL** to automate agricultural project reporting, improving data accessibility and workflow efficiency by **35%** across **15+ international initiatives**.
- Assisted in developing an **Arabic AI assistant (AraBERT)** handling **5K+ queries** with **92% accuracy** and **99.999% uptime**, contributing to **Agile sprints** using **Git** and **automated tests** to deliver **secure software** with a **20% error reduction**.

Teaching Assistant (Programming in C)

Spring 2025 – Present

USF College of Engineering

Tampa, Florida

- Led weekly review sessions and peer-led workshops for over **150 students** in an **Intro to C Programming course**, answering questions, guiding coding practice, and grading exams and assignments to support learning and improve course performance.

Resident Assistant

August 2024 – Present

USF Residential Education

Tampa, Florida

- Led **30+** one-on-one mediations with a **100% resolution rate**, demonstrating strong communication, empathy, and conflict-management skills to maintain a positive residential environment.
- Planned and executed **15+ cultural and academic programs**, leveraging teamwork and event planning to **increase resident participation by 25%** and engage a community of **700+ students**.

PROJECTS

Zeno | Full-Stack Application

August 2025 – Present

- Developed a **data-driven fintech platform** using **Flask (Python)** as the backend, **React** frontend, and **Pandas** for analytics that recommends optimal credit cards per transaction based on **AI-driven insights** and spending behavior.
- Built an interactive **analytics dashboard** using **Tableau** and **Power BI** to visualize user spending patterns, cashback projections, and card performance, resulting in a **30% increase in reward utilization** and a **40% reduction in decision time**.
- Implemented **JWT authentication**, request rate limiting, and efficient API routing to achieve **<200 ms response time** and **99.9% uptime** without reliance on cloud services, ensuring lightweight and flexible local deployment.

All-Verse | Full-Stack Application

July 2025 – Present

- Built a **cloud-hosted AI marketplace** using **Next.js** and **Firebase** with **Stripe API** integration, applying Agile development practices using JIRA; creating **REST endpoints** for secure transactions and real-time buyer-seller chat serving **200+ users**.

LEADERSHIP

USF CHIP (Founder & Vice President)

May 2025 – Present

- Founded the Computer Hardware & Integrated Processors (CHIP) Club, the first USF student organization dedicated to hands-on digital design and hardware projects.

USF SHPE (Tech Director)

July 2025 – Present

- Built hackathon tracks for **HackJam** to engage first-time hackers; leading development of the **Hackabull 2025** website for registration, scheduling, and real-time updates, collaborating with student leaders and alumni to reach **600+ registrations**.

USF Google Developer Group (Tech Lead)

December 2024 – Present

- Hosted technical workshops on **GitHub Pages**, **AI chatbots (OpenAI API)**, and **SQL databases**, training **100+ students** through hands-on coding sessions and promoting campus innovation through project-based learning.
